Font definition option `cmmib57.sty`

American Mathematical Society

3.00, 2009/06/22

1   Introduction

This file used to contain alternate font definition statements for use with an earlier set of Type 1 fonts that did not have 6, 8 or 9 pt design sizes. It is now obsolete. (See the discussion of the `psamsfonts` option in the `amsfonts` package documentation.)

Package info:

```
1 \NeedsTeXFormat{LaTeX2e}% LaTeX 2.09 can't be used (nor non-LaTeX)
2 [1994/12/01]% LaTeX date must be December 1994 or later
3 \ProvidesPackage{cmmib57}[2009/06/22 v3.00 %
4   *obsolete* alternate cmmib, cmbsy font definitions]

5 \PackageWarningNoLine{cmmib57}{This package is obsolete with AMSfonts v3}
```

The usual `\endinput` to ensure that random garbage at the end of the file doesn't get copied by `docstrip`.

```
6 \endinput
```

Index

Numbers written in italic refer to the page where the corresponding entry is described; numbers underlined refer to the code line of the definition; numbers in roman refer to the code lines where the entry is used.
